TLD America

812 Bloomfield Ave

Windsor, CT

Dear Hiring Manager,

I am here to apply for the position of Electrical Assembler (2nd Shift). I am sincerely motivated by the possibility of working with printed circuit boards, backplane assemblies and electromechanical solutions. I recently earned a certification in Lean Six Sigma and I can't think of a better way to combine my knowledge of process improvement, waste management, and statistical analysis with the manufacturing of electronics.

I have been able to learn the basic components that make up every circuit board. To my knowledge, this includes components like capacitors, diodes, transistors, integrated circuits, and semiconductors to name a few. I have been able to align these components with their respective symbols on a schematic. Building my knowledge in electrical circuitry stems from a natural interest in how things work, and more importantly how electronics work.

My only ambition is to work with electronics and grow with a company that can eventually place me in a CAD drafting position that has to do with making technical drawings for electromechanical solutions. I am new to CAD drafting, and I am new to applying my knowledge of electronics in the manufacturing/production industry. I am not new to problem solving and developing solutions to the problem at hand. My goal is to become an experienced electronics/electrical draftsman, that goal cannot be achieved without practical knowledge and experience on how electronics come together in the manufacturing process. I have my time, and quality of service to offer to TLD America.

While my attached resume provides an outline of my abilities, I would welcome the opportunity to further discuss how I can contribute to the day-to-day work at TLD America in a personal meeting. Please let me know if you have additional questions. You can reach me at Jovanijc12@gmail.com or (203)-343-9186. Thank you for your time and consideration.

Best Regards,

Jovani Jean-Charles
