

Samuel wale Olawoyin

Electrical engineer

Profile

Experienced Senior Mechanic with a strong background in mechanical, HVAC and electrical engineering. I have over 8 years of experience working with Emirates Airline, Home Team Technical Service, and Netrux Global Concept. My expertise includes complex problem solving, knowledge of technical diagrams, and the ability to work in a team. I have received accolades such as the Najam Award for making a distribution board for aircraft maintenance and repairing a hub cleaning machine in the wheel shop. My future goals include continuing to excel in the field of electrical engineering and expanding my knowledge in emerging technologies. With my skills in communication, critical thinking, and decision making, I am confident in my ability to contribute to any electrical engineering team.

Employment History

Senior Mechanic at Emirates Airline

January 2015 — October 2023

As a Senior Mechanic at Emirates Airline, I was responsible for performing maintenance and repairs on aircraft. I utilized my technical expertise and knowledge of aircraft systems to ensure the safe and efficient operation of aircraft.

- Performed scheduled maintenance and inspections on aircraft to ensure compliance with safety regulations.
- Diagnosed and repaired aircraft malfunctions, including engine issues and electrical problems.
- Collaborated with a team of mechanics to complete maintenance tasks efficiently and effectively.
- Maintained accurate records of maintenance activities and performed regular inspections to ensure optimal aircraft performance.

HVAC Technician at Home Team Technical Service

May 2013 — December 2014

As an HVAC Technician at Home Team Technical Service, I was responsible for installing, maintaining, and repairing HVAC systems. I utilized my technical skills and knowledge of HVAC systems to ensure optimal performance and energy efficiency.

- Installed and commissioned HVAC systems, including air conditioning units and ventilation systems.
- Performed routine inspections and maintenance on HVAC equipment, identifying and resolving any issues to prevent breakdowns.
- Diagnosed and repaired malfunctions in HVAC equipment, ensuring the efficient operation of systems.
